CE Broker #50-951

Holy Cross Hospital Nurses....

Do you have an interest in nursing research and would like assistance in conducting a research project?

Consider applying for the *Holy Cross Nurse Scholar Fellowship*. This program aims to improve patient care by conducting nursing research. Selected nurse scholar/s will receive dedicated non-clinical hours over 18 months, mentored research from nurse scientists and support from advanced practice nurses for the development and completion of approved nursing research projects. Program details, eligibility and application requirements can be found in the *Holy Cross Nurse Scholar Fellowship* brochure (can be obtained from the Nursing Office and Learning Center).

The 5th Annual Nursing Research Symposium

Objectives

- 1) Describe the principles and structure of evidence-based practice.
- 2) Define levels of evidence.
- 3) State common barriers associated with implementation of evidence-based practice.
- 4) Compare the purpose of descriptive, parametric and non-parametric statistical tests.
- 5) Compare and contrast quantitative and qualitative research articles.
- 6) Describe the steps of quantitative data collection and analysis.
- 7) State the key elements of preparing for a podium presentation.
- 8) List three strategies of manuscript publication.
