

**Nursing Student Skills & Procedures  
Holy Cross Hospital**

**Student Name:**

**School:**

**Clinical Instructor:**

**Instructor's phone#:**

| <b>Comfort Skills</b>   | <b>Perform with<br/>Instructor Only</b> | <b>May Perform with<br/>Holy Cross RN</b> |
|---|---|---|
| Ambulation of patient   |   |   |
| Bedbath   |   |   |
| Enema administration  |   |   |
| Evening care  |   |   |
| Logrolling/turning/positioning                                |   |   |
| Toileting/Bedpan/Perineal care                                |   |   |
| Transfer patient to commode/chair/bed                         |   |   |
| <b>Fundamental Skills</b>                                     | <b>Perform with<br/>Instructor Only</b> | <b>May Perform with<br/>Holy Cross RN</b> |
| Assessment: Daily flow sheet assessment in computer           |   |   |
| Assessment: Pain  |   |   |
| Blood specimen draw from peripheral vein                      |   |   |
| Blood specimen draw from central line                         |   |   |
| Dressing change   |   |   |
| Dressing change: Central line                                 |   |   |
| Gloves - Donning clean gloves                                 |   |   |
| Gloves - Donning sterile gloves / sterile field               |   |   |
| Injection - IM injection administration                       |   |   |
| Injection - Intradermal injection administration              |   |   |
| Injection - Sub-Q injection administration                    |   |   |
| IV insertion (peripheral)                                     |   |   |
| IV discontinue (peripheral)                                   |   |   |
| IV fluids / IV piggyback initiation                           |   |   |
| IV prime tubing   |   |   |
| Medication - administer PO meds                               |   |   |
| Medication - administer meds via NG tube                      |   |   |
| Naso-gastric tube insertion                                   |   |   |
| Naso-gastric tube discontinue                                 |   |   |
| Ostomy care   |   |   |
| Protective gear - Donning protective gear                     |   |   |
| Sequential Compression Device (SCD) application/removal       |   |   |
| Tracheostomy care   |   |   |
| Tracheostomy suctioning                                       |   |   |
| Urinary catheter insertion                                    |   |   |
| Urinary catheter discontinue                                  |   |   |
| Vital signs   |   |   |
| <b>Students may NOT perform the following per HCH policy:</b> |   |   |
| Blood glucose monitoring/Point of care testing                | Never                                   | Never                                     |
| Blood transfusion   | Never                                   | Never                                     |
| Chemotherapy administration                                   | Never                                   | Never                                     |
| IV push medication  | Never                                   | Never                                     |
| Restraint application/removal                                 | Never                                   | Never                                     |
